Flutter & Dart - Complete App Development Course

Congratulations on completing Flutter Development for Beginners! You have gained comprehensive skills in building dynamic mobile applications using Flutter. This course covered setting up your development environment, creating your first app, working with Flutter widgets, and implementing state management using the Provider package. Through hands-on projects like building a Tip Calculator, Movie App, and Water Intake Tracker, you have developed expertise in integrating Firebase, SQLite, and JSON parsing for dynamic data handling. This certification signifies your proficiency in Flutter, equipping you with the skills to efficiently develop and manage mobile applications.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
