Adham Medhat Elsaied

has successfully completed the online Specialization

MERN Stack Front To Back: Full Stack React, Redux & Node.js

Congratulations on successfully completing the MERN Stack Front To Back: Full Stack React, Redux and Node.js course! You have mastered the MERN stack, covering MongoDB, Express, React, and Node.js. Throughout the course, you built a solid backend foundation, configured databases, and created robust API routes with secure user authentication and data validation. You then advanced to frontend development, managing state with Redux, creating dynamic user interfaces, and integrating backend services. By deploying a fully functional, production-ready application, you've gained comprehensive skills in full-stack development. Well done!

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
