Claude Code: Software Engineering with Generative AI Agents

AI Agents and Agentic AI with Python & Generative AI

Prompt Engineering for ChatGPT

OpenAI GPTs: Creating Your Own Custom AI Assistants

Oct 16, 2026

Jules White

Adham Medhat Elsaied

has successfully completed the online Specialization

Generative AI Software Engineering

This specialization demonstrates mastery of AI-powered software engineering through hands-on development of integrated automation systems. Learners gain practical experience orchestrating Claude Code agents to build full-stack applications in minutes while managing parallel development streams across multiple git branches. The coursework includes developing Python-based autonomous agents that independently process data, analyze documents, and execute complex multi-step workflows without human intervention. Graduates successfully engineer sophisticated prompts and deploy custom GPTs tailored to specific business contexts, transforming generative AI tools into domain-expert assistants for complex professional tasks.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
