Getting Started with Google Gemini API

Exploring AI with Google AI Studio

Gemini Capstone Project

Oct 16, 2026

Google DeepMind

Google DeepMind

Adham Medhat Elsaied

has successfully completed the online Specialization

Gemini for Developers

This specialization helps developers become AI Application Developers who are proficient in the Google Gemini ecosystem. You will progress from making your first API calls to architecting sophisticated, autonomous agents. During the specialization, you integrated Gemini Pro and Flash models into applications using Python or JavaScript, optimized model behavior in Google AI Studio. Built agents that use function calling, Google Search grounding, and URL context to perform multi-step tasks, implemented structured JSON output and error handling for production-ready data, managed token economics and deployed live applications to the cloud via Cloud Run.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
