Introduction to Computer Programming

How Computers Work

Mathematics for Computer Science

Oct 15, 2026

Adham Medhat Elsaied

has successfully completed the online Specialization

Introduction to Computer Science and Programming

This specialisation covers topics ranging from basic computing principles to advanced mathematical foundations required for computer science. You will learn fundamental concepts of how computers work, which can be applied to any software or computer system. You will also gain the practical skillset needed write interactive, graphical programs at an introductory level. The numerical mathematics component will provide you with numerical and computational tools that are essential for the problem solving and modelling stages of computer science.

Dr Edward Anstead,
Associate Lecturer,
Goldsmiths

Dr Simon Katan,
Lecturer, Goldsmiths

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
