

3 Courses

Software Engineering: Modeling Software Systems using UML

Software Engineering: Implementation and Testing

Software Engineering: Software Design and Project Management

Oct 15, 2026

Adham Medhat Elsaied

has successfully completed the online Specialization

Software Engineering

This specialization covers software engineering methodologies, techniques, and tools for planning, capturing requirements, designing, implementing, testing, and maintaining large-scale software systems. It combines scientific and technological knowledge with many hands-on examples and real-life case studies for students to apply software engineering skills in a realistic development environment. This specialization is for programmers who want to deepen their understanding of the methodologies and techniques involved in software development. Basic object-oriented programming (OOP) concepts are required to attempt the series of courses.

Kenneth Wai-Ting LEUNG, Associate Professor of Engineering Education, Department of Computer Science and Engineering, HKUST

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
